TECH TALK

Aruba Solutions For Futuristic Workplaces

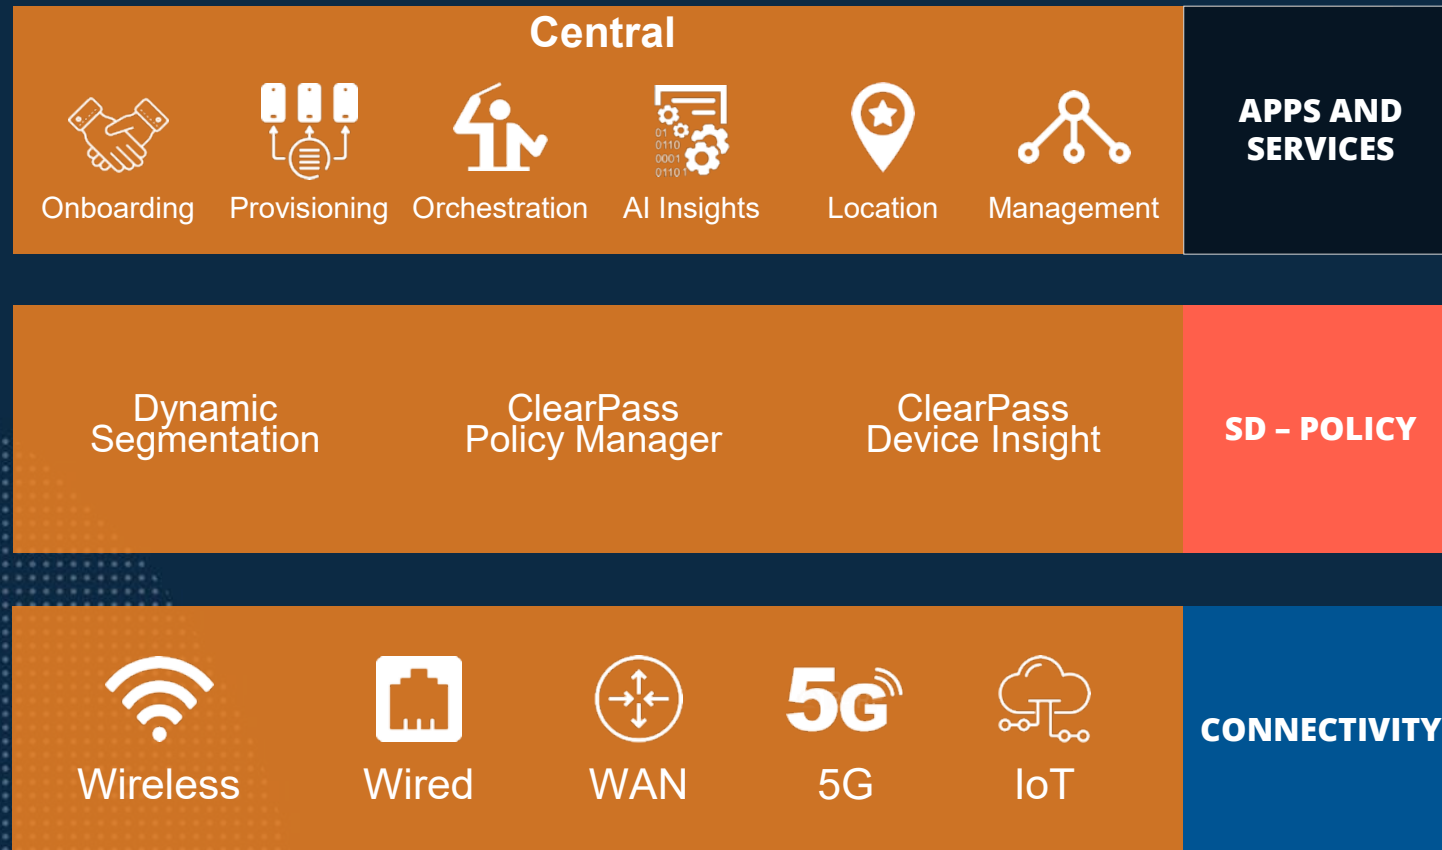

Networking Challenges / Requirements at the IT/ITES

- *No centralized network management and monitoring capabilities*
- *High Real Estate costs - Monitor real estate utilization and optimize the spaces*
- *Borderless ODCs – Network follows the users and seamless application access*
- *All wireless offices !*
- *Application aware infrastructure and prioritize business critical applications*
- *Day 0 and Day N automation*
- *Reduce MTTR*
- *How to monitor QOE of employees ?*
- *Contact tracing solutions*

Aruba & Dropbox case study

THE ARUBA Edge Services Platform Architecture

Aruba ESP – High Level Design

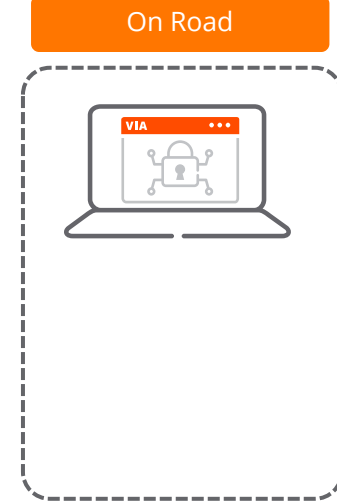

Central

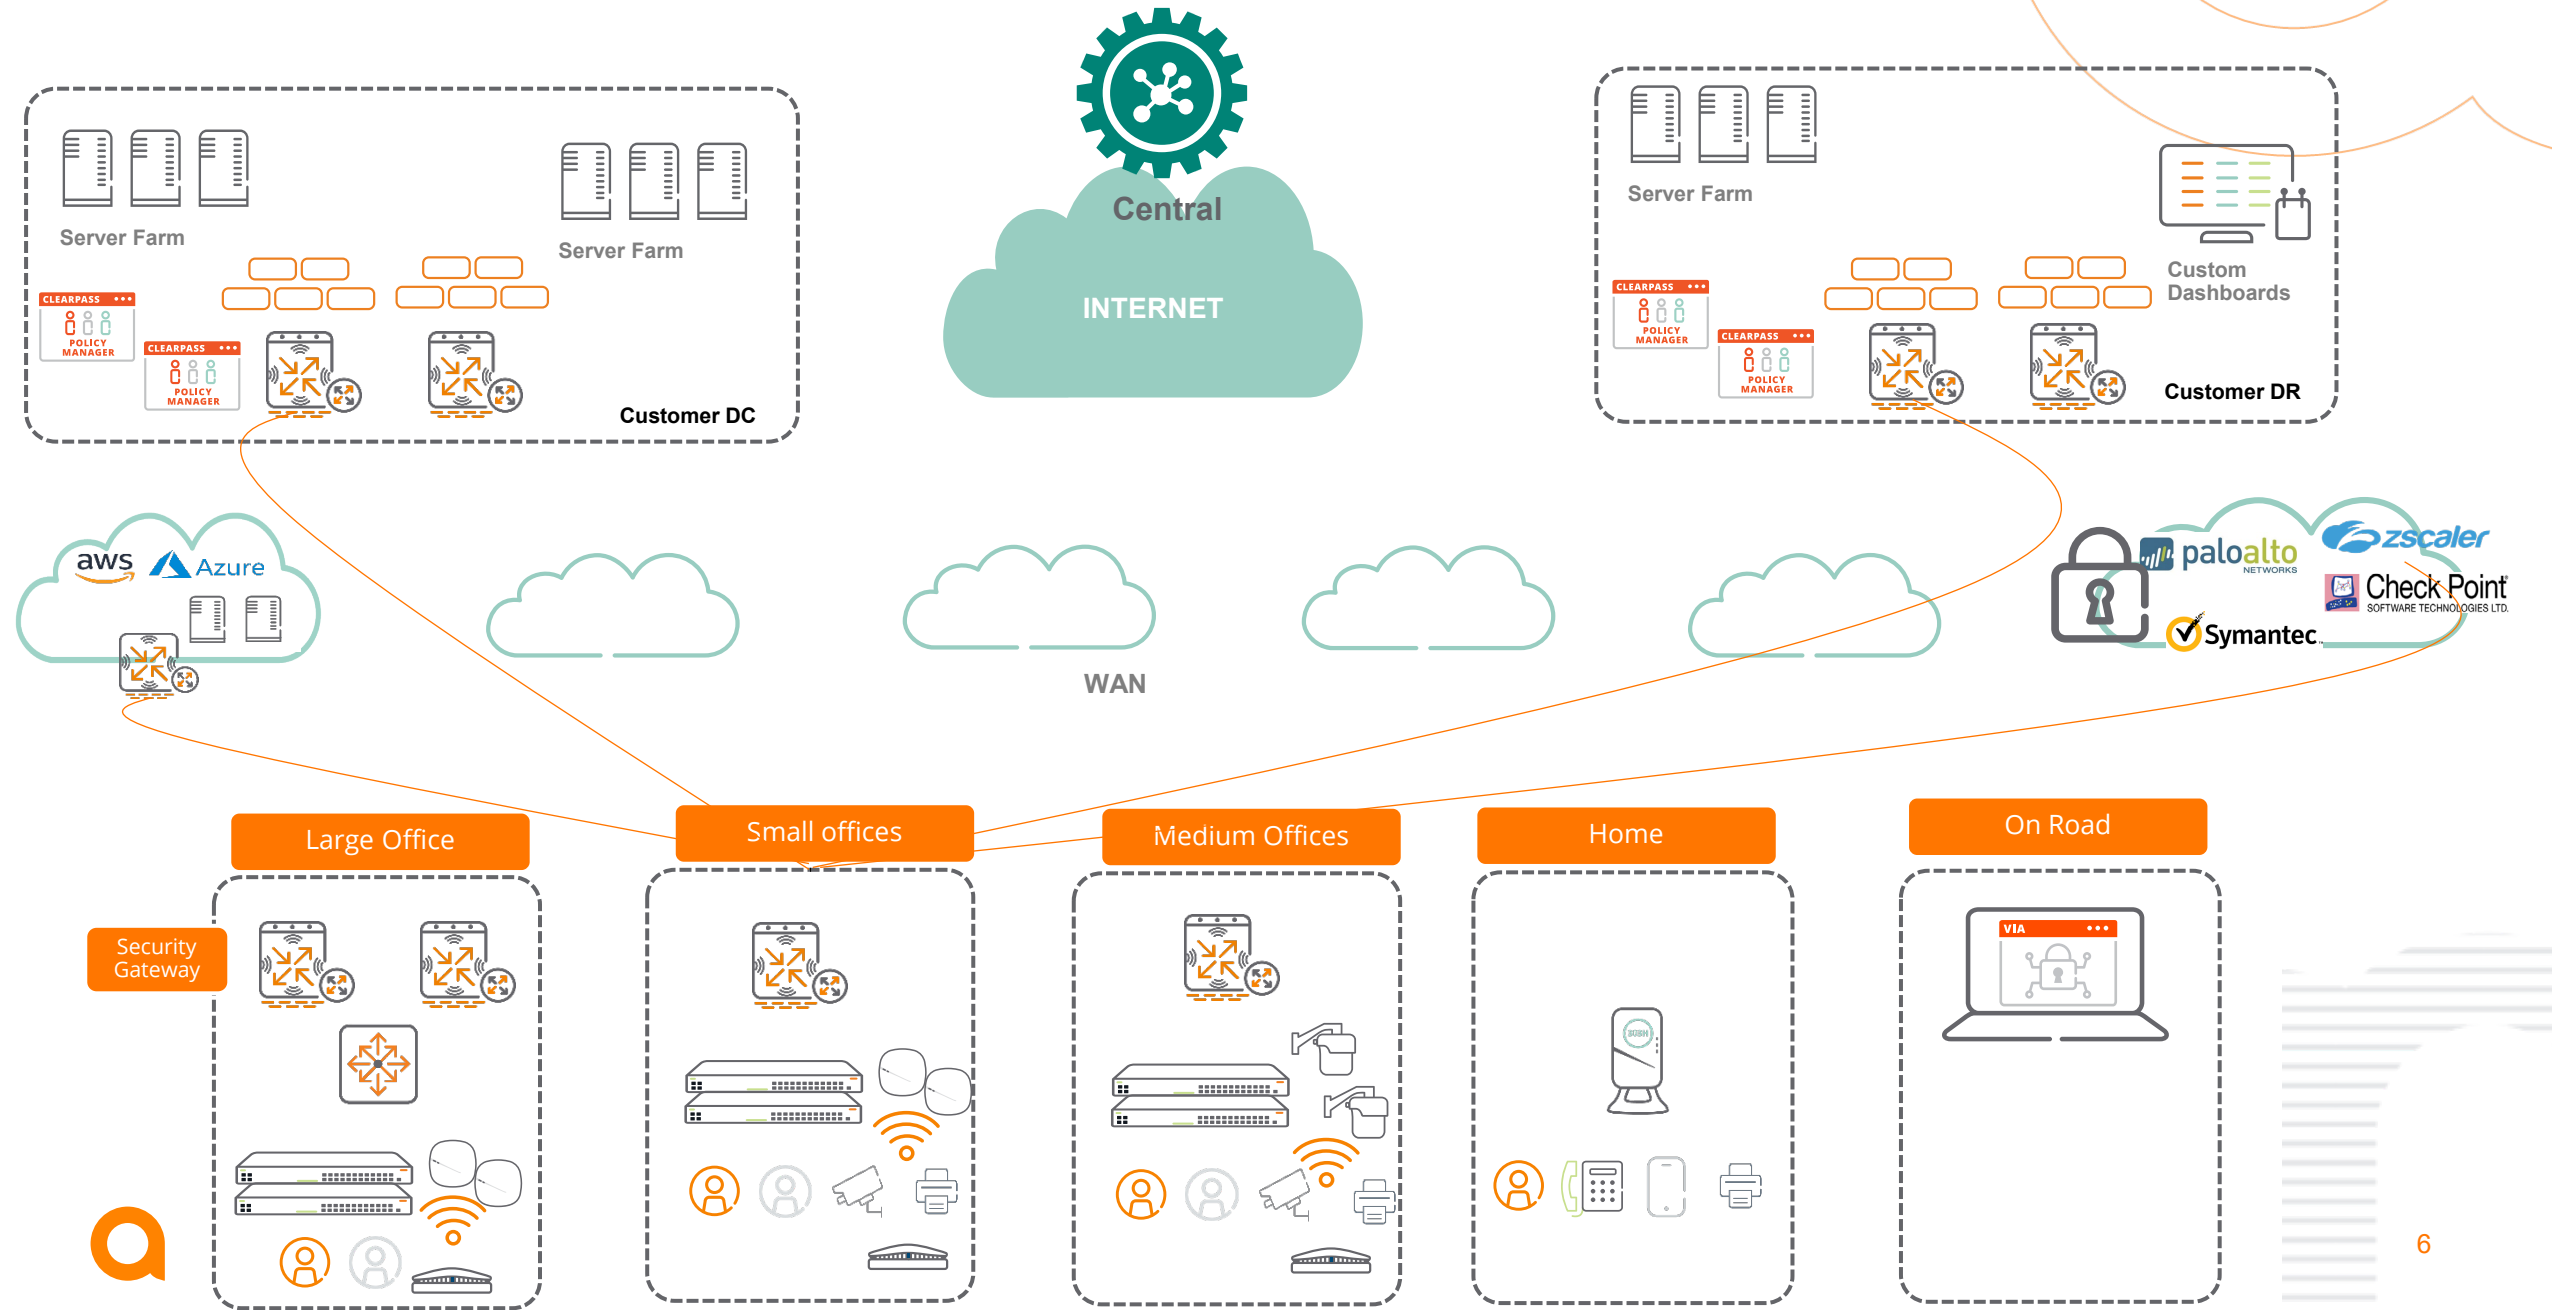

INTERNET

WAN

Aruba ESP – High Level Design

Extend Enterprise connectivity to Home

- Private Home Network
- Enterprise Network
- Voice Network
- IPsec tunnel

Endpoint Visibility

ClearPass Device Insight

Reduces Risk by Eliminating Blind Spots through DPI-based discovery and profiling of devices

Automatically Clusters Devices and Recommends Classification using advanced machine learning and crowdsourcing intelligence

Enriches Visibility with vulnerabilities / posture assessment and risk score

Ensures Secure Access via seamless integration with ClearPass Policy Manager

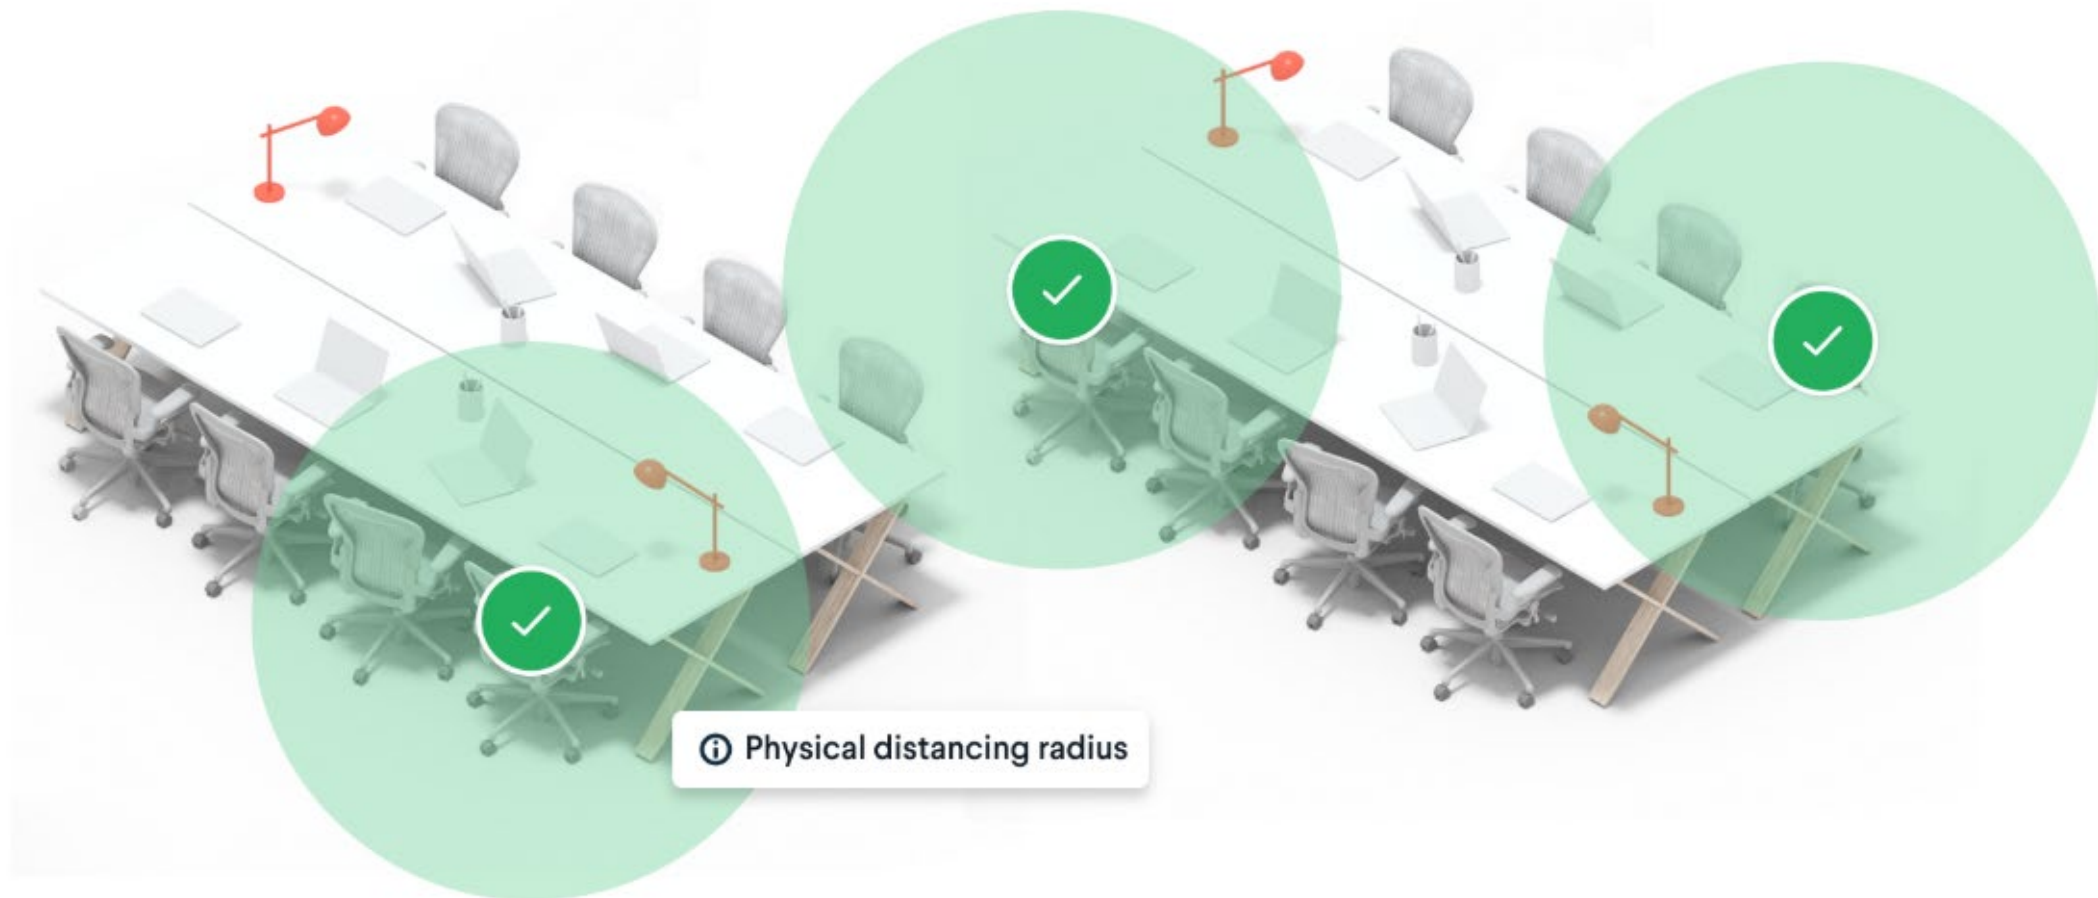

Employees Experience & ZTNA

Desk Booking and Seamless Access across enterprise

Dynamic segmentation to ensure seamless access and Robin for Desk booking

User can pre-book their desks before arrival using Robin application

Flexible and Secure Network Segmentation

Aruba Dynamic Segmentation

AUTOMATED

Save time and reduce misconfigurations

SEGMENTED

Improve traffic separation and security posture

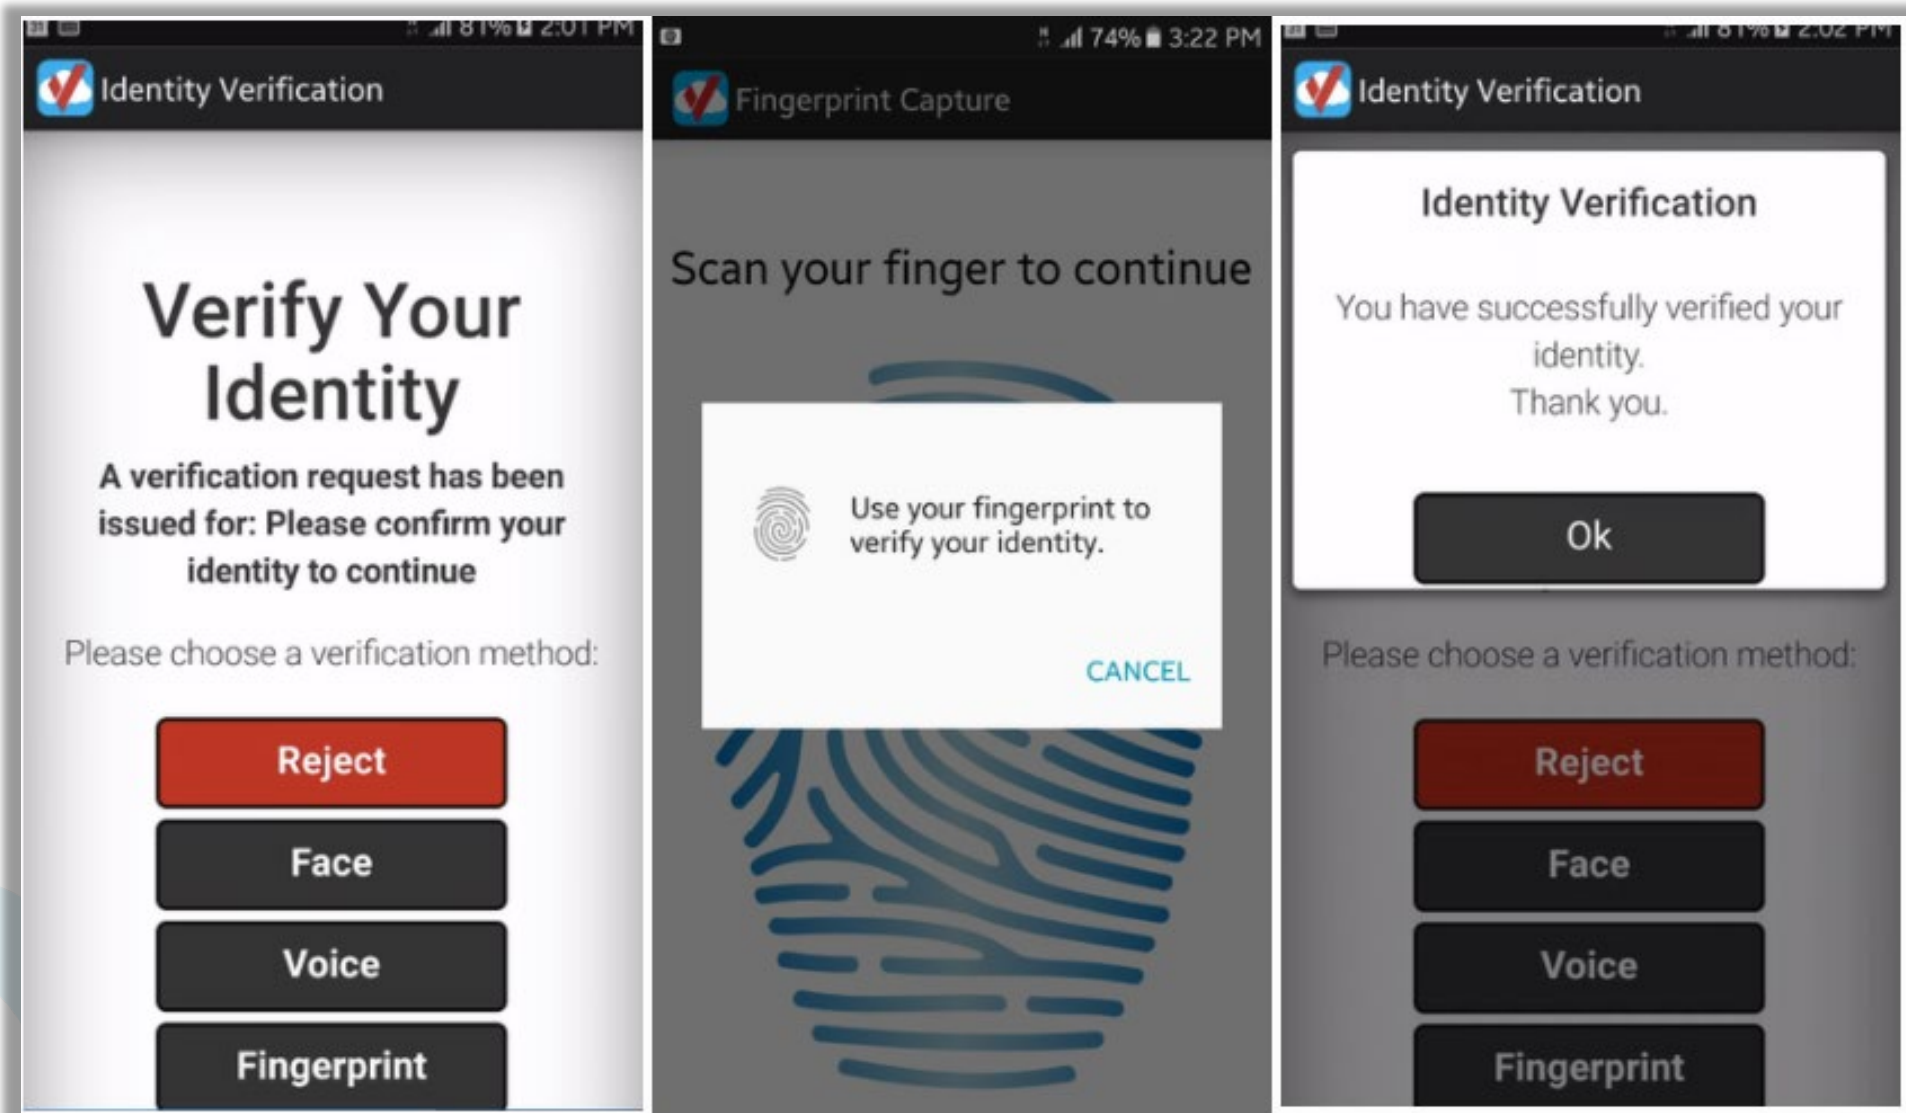

CENTRALIZED

Enhance visibility and management

ClearPass and MFA

Strong security with a simplified user experience

ClearPass and Device Registration

CLEARPASS GUEST ACCESS

HELPING CUSTOMERS BUILD CUSTOMIZED, SECURE GUEST EXPERIENCES

Fully customizable and brandable guest access capabilities

Integrations with key property management, billing and visitor management systems

Provides a platform to reach customers and capture valuable end-user information

ClearPass & Envoy Integration

Automatic Guest Wi-Fi with a WOW factor !

CLEARPASS POLICY MANAGER AUTOMATES SECURE ACCESS

140+ Ecosystem Partners

Multi-Vendor WLANs

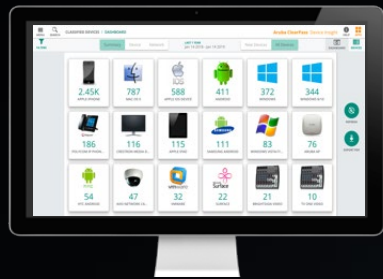

Multi-Vendor Switching

ClearPass Policy Manager
AUTOMATED SEGMENTATION AND ENFORCEMENT

Bi-Directional Data Exchange

ClearPass Device Insight
ENHANCED DISCOVERY / PROFILING

Internet of Things (IoT)

BYOD and Corporate Owned

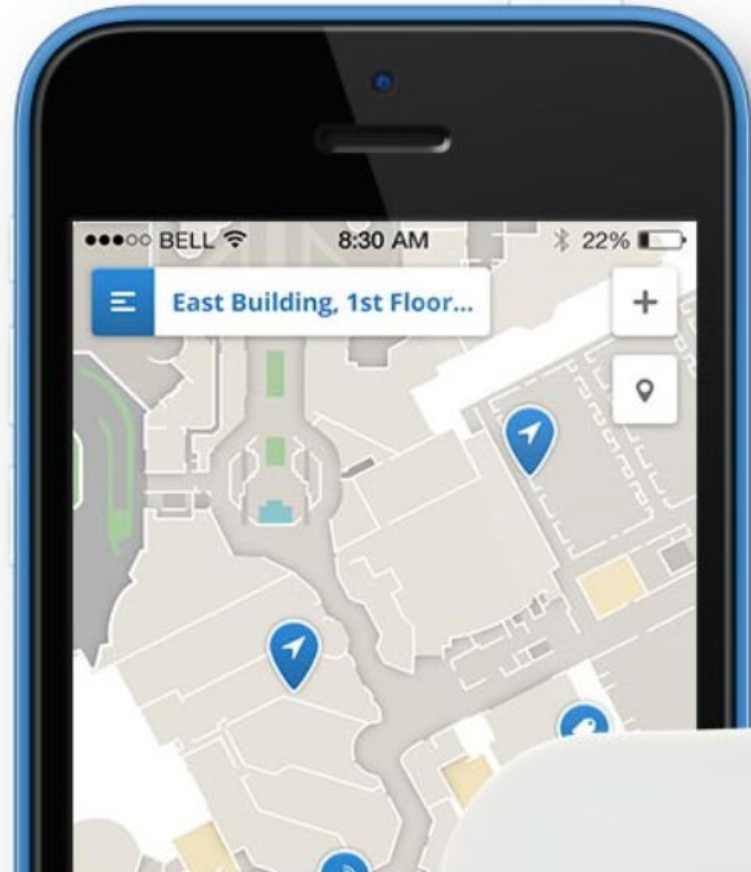

40%
Of the Global 500

Meeting Room Booking Solution

Robin + Aruba Meridian: indoor way finding

- Add indoor maps and way finding
- Book and navigate to conference rooms

Robust High Availability & Live Upgrades

Controller Clustering

Minimizing the failure domain to maintain business continuity

UNPLANNED

True seamless failover with zero interruption to user sessions

PLANNED

In-service upgrades mean no more maintenance windows

MAXIMUM SCALE

Manage up to 100,000 APs and aggregate hardware scaling

DYNAMIC LICENSES

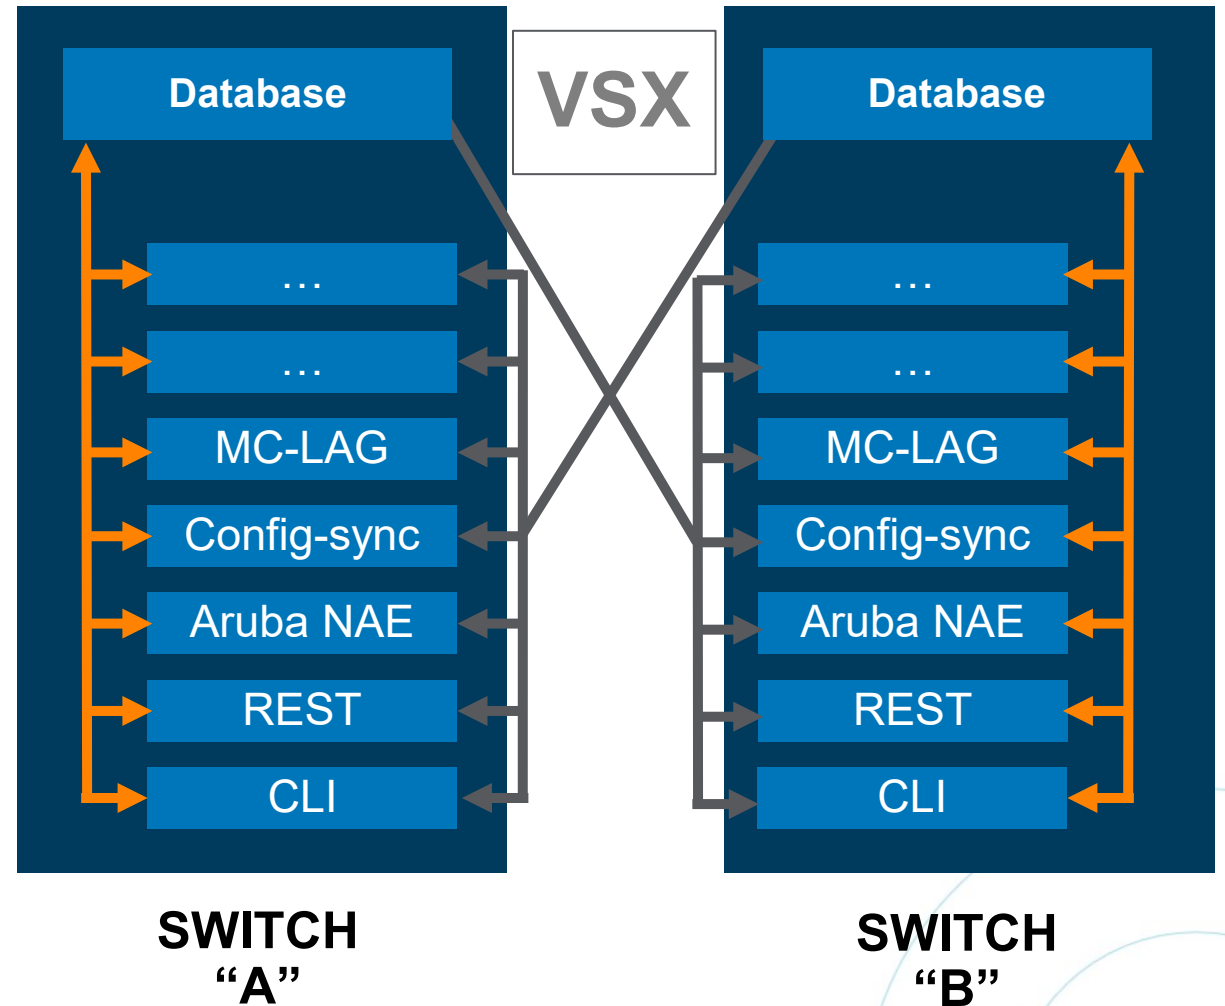

Configuration hierarchy ensures flexible customization

Resiliency Enables Always-on Availability

Aruba VSX Live Upgrades

- Orchestrated upgrades
- Delivers on the promise of ISSU
- No maintenance windows mandated
- Gradual and planned traffic re-balancing
- Dual Control-Plane equals Software Redundancy

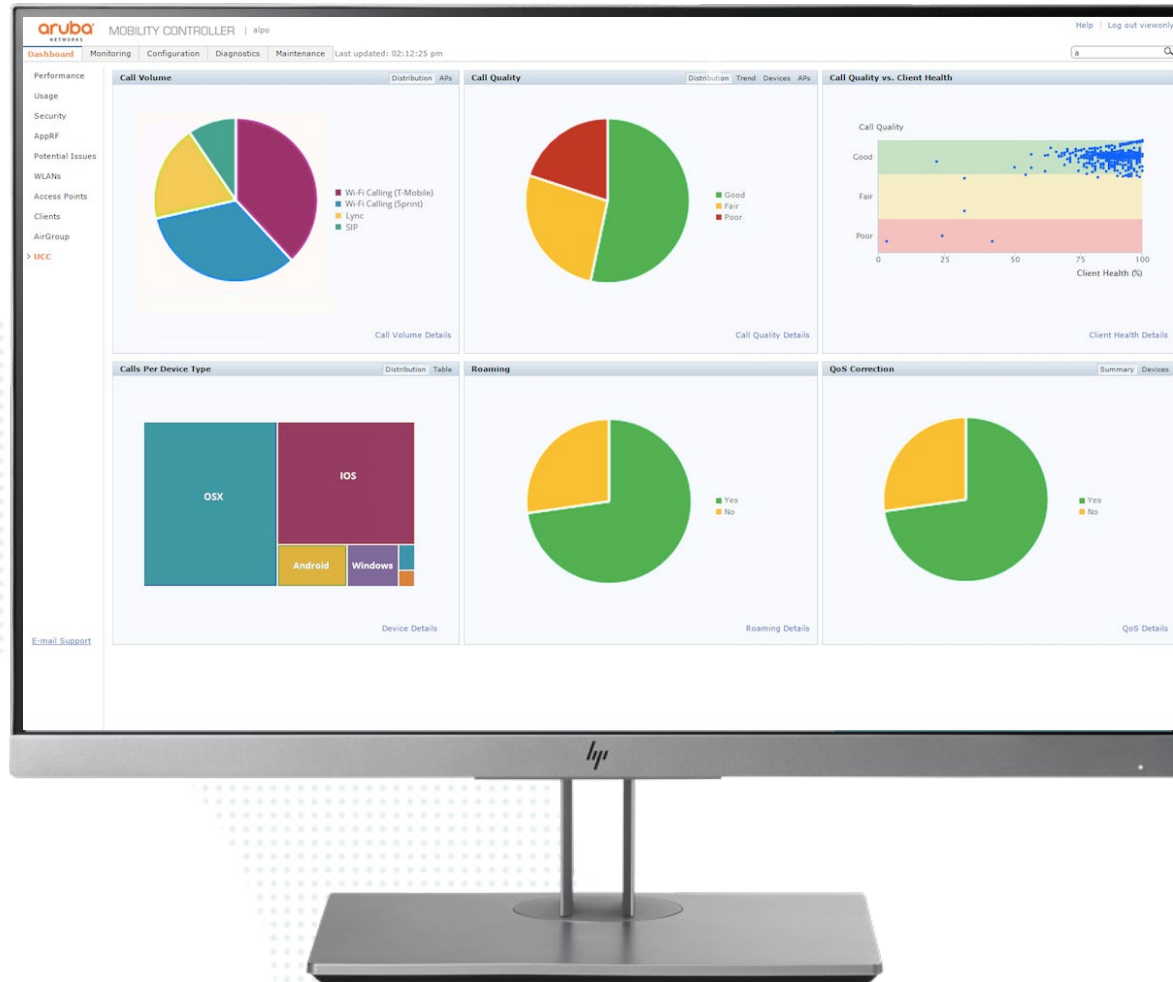

Application Aware Infrastructure

Rich Application and UCC Visibility

Enhanced with unique Microsoft and Apple features

Microsoft and Apple Apps

Prioritize Office365, Skype for Business, Teams, Facetime

Seamless Cellular Experience

Optimize for Wi-Fi Calling, support Hotspot 2.0, and use advanced cellular filtering

BYOD Device Optimization

Easily fingerprint iOS, MacOS, Windows, and Android devices

Application Aware QOS- Air Slice

- SLA- Grade Application Assurance For Latency Sensitive Applications
- Air Slice Allocates Wi-Fi 6 Radio Resources Based On Application Intelligence From PEF
- Air Slice Complements ClientMatch And Air Match As Part of Aruba's RF Optimization Technologies

Applications List

Skype For Business
Amazon Web Services
Office 365
FaceTime
GoTo Meeting
Slack
Cisco WebEx
Zoom
DropBox
GitHub

IAP-555

Samsung S10

 Priority Traffic : VR Flow

 Background Traffic : TCP Flow

Test Results

	Air Slice Disabled	Air Slice Enabled	Configuration Details
VR Flow	Frame Delay : 60-70 MS Throughput : 110 Mbps	Frame Delay : 35 MS Throughput : 165 Mbps	✓ HE Enabled ✓ Channel Width 40 MHz ✓ IAP
TCP Flow	Avg. Throughput : 320 Mbps	Avg. Throughput : 270 Mbps	

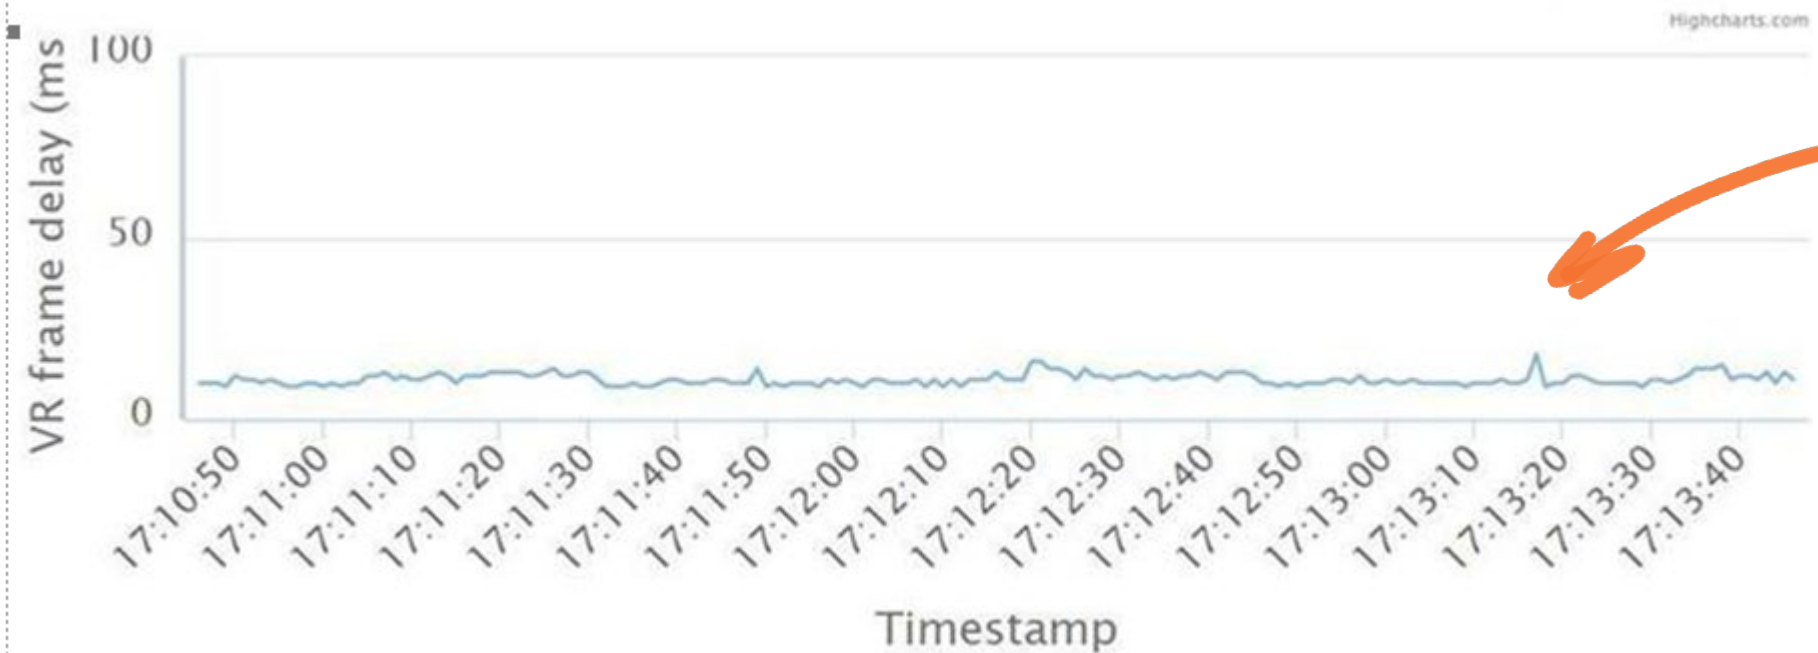

Results: Frame Delay

Air Slice Disabled

- Frame Delay >50 MS

Air Slice Enabled

- Frame Delay < 50 MS

Results : Throughput

Air Slice Disabled

- VR Throughput getting throttled

Air Slice Enabled

- Met Throughput SLA

Day N Operations

AIOPS WITH ARUBA EDGE SERVICES PLATFORM

AI Insights

Automated anomaly detection and network optimization

AI Search

Natural language queries

AI Assist

Automated trouble ticket generation

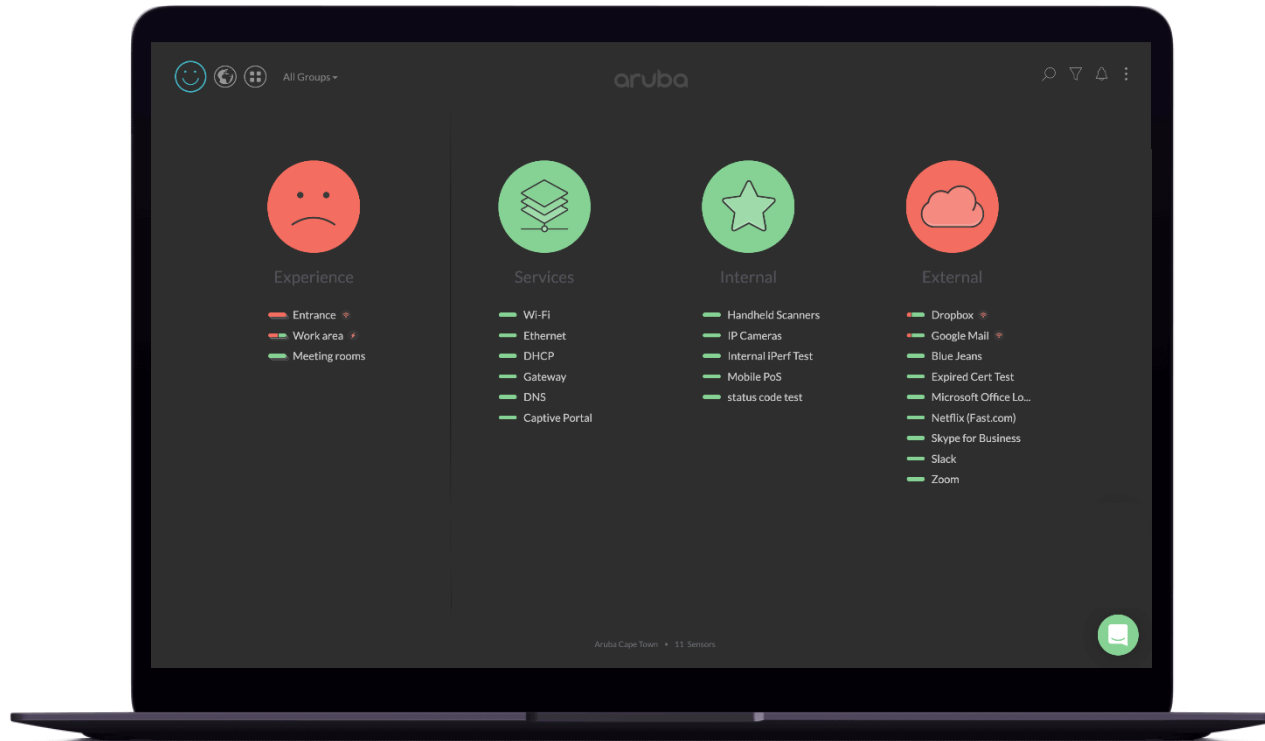

AI Driven Device Profiling

IoT visibility to drive access policies

Virtual IT Admin for Proactive Monitoring of Sites

End to End application monitoring and User experience monitoring without human intervention

Performance is OK

There's an issue

Contact Tracing Solution

Contact & Location Tracing using BLE

During RTO

Users are issued Aruba Tags

Aruba 300/500 series APs sense tags in-building

Meridian cloud determines tag locations

Data streamed to visualization and rules engine SW

Near real time

User is sick and informs org

HR looks up user tag and queries contact tracing SW for potential user and location contacts

HR generates report listing dwell time at various AP/building locations for sick person. Enhanced cleaning can be focused on those areas.
